

Physicians' Online Tutorial for Completing Cause of Death on the Florida Death Record

The Department of Health Bureau of Vital Statistics, in cooperation with the Florida Medical Association and the Florida Association of Medical Examiners, has developed an **online tutorial for physicians**.

This tutorial is constructed for physicians, providing an overview of the death registration process in Florida and how to go about properly completing the medical information on the death record.

The tutorial provides sample case histories; an explanation of the physician, the medical examiner, and the funeral director's responsibilities in getting death records filed; how mortality data is used and why the death record is so important to families.

The Florida Medical Association has approved this activity for *AMA PRA Category 1 CreditTM*. This complimentary tutorial takes about one hour to complete and can be accessed at the website shown below.
